About Biomind Labs Inc.

Biomind is a biotech research and development company aimed at transforming biomedical sciences knowledge from natural psychotropic plants into novel pharmaceutical drugs and innovative nanotech delivery systems for a variety of psychiatric and neurological conditions. Through its acceleration platform, Biomind is developing novel pharmaceutical formulations of the main natural psychedelic molecules, N, N-dimethyltryptamine (DMT), 5-MeO-DMT and mescaline for treating a wide range of therapeutic indications. Biomind's focus is to guarantee patients access to affordable and modern-day treatments and use cases. Biomind understands that long-lasting psychedelic effects make it difficult to create adequate clinical protocols to serve a larger number of patients, and this is the reason why Biomind specializes in fast-acting psychedelics.
