ACCESSWIRE

# Eversio Wellness Harvests Its First Legally Grown Psychoactive Mushrooms

Tue, September 21, 2021, 9:00 AM · 2 min read

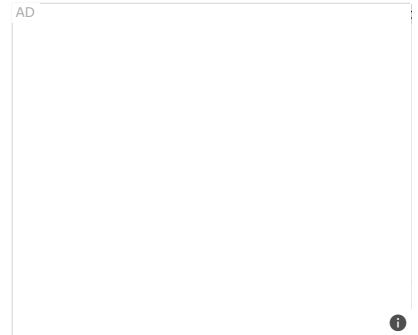

**SURREY, BC / ACCESSWIRE / September 21, 2021 /** Eversio Wellness Ltd. ("Eversio" or the "Company"), a mushroom wellness company, has harvested its first legal flush of psilocybin producing mushrooms under its Health Canada-issued Controlled Substances Dealer's Licence. Psilocybin mushrooms, commonly known as magic mushrooms, contain a naturally occurring psychoactive compound, called psilocybin, involved in many clinical trials and research studies looking at its potential benefits for treating depression, post-traumatic stress disorder, addiction and withdrawal, autoimmune diseases and other brain health conditions.

In July, Eversio received its Health Canada regulatory approval to produce psilocybin for research and development, including supplying products to clinical and research trials, and to supply prescription-controlled substances to patients in need through partnerships with health care providers using Health Canada's Special Access Program.

"Our mission is to improve lives by producing safe, standardized, natural psilocybin-based products that hold the potential to reduce suffering in many ways," said Craig Garden, Eversio's CEO. "Our first harvest marks a significant chapter in our company's story as we are one step closer to bringing psychedelic mushrooms to research and healthcare communities across Canada and through global partnerships."
